Education

Institute Of Aeronautical Engineering, GPA: 8.58 — Sept 2023 – June 2026
- B.Tech in Computer Science and Data Science

Government Polytechnic College, GPA: 9.63 — June 2020– May 2023
- Diploma in Mining

SR PRIME SCHOOL, GPA: 10.00 — April 2020
- S.S.C

Skills

Languages: Python, Java, SQL, HTML, CSS
Frameworks/Libraries: NumPy, Pandas, OpenCV, Bootstrap, Flask, Streamlit
Interpersonal: Leadership, Management, Communication, Problem-solving, Critical Thinking

Projects

Diet Mate -(A website for Diet recommendations) - github — Dec-2024
(Flask, MySQL, Python)
- Developed a full-stack Flask web application for personalized diet management, featuring user authentication, profile management, and dynamic dashboard with calorie and BMI tracking.
- Integrated MySQL database using SQLAlchemy ORM to securely store user data, dietary profiles, and activity levels, enabling tailored nutrition recommendations and progress monitoring.
- Implemented modular backend logic for user onboarding, goal setting, and food plan generation, enhancing user engagement through step-by-step profile completion and real-time feedback.

Fire Detection and Alarming System - github — May-2025
(OpenCV, YOLO, PyQt5)
- Built an AI-driven fire detection model using YOLOv5 and OpenCV, trained on a curated dataset of 2,000+ annotated images, achieving **83%** mAP accuracy and ensuring robust real-time detection.
- Implemented an alerting pipeline with Gmail SMTP and Twilio APIs to send instant email (with image evidence) and SMS notifications, reducing response time to emergencies by up to **90%**.
- Developed a PyQt5 desktop interface with support for multiple input sources including webcams and RTSP streams, offering intuitive monitoring, low-latency inference, and ease of deployment.

PDF Summarizer - github — Sep-2024
(Python, NLP, flask)
- Created an automated summarization system in Python to extract and condense key information from large PDF documents using pdfplumber for text extraction and NLP algorithms for summarization.
- Deployed the solution as a Flask web app, enabling users to upload PDFs and instantly receive concise, structured, and human-readable summaries through an interactive interface.
- Enhanced efficiency by reducing manual review time by **70%**, making document analysis faster for academic, business, and research purposes, while maintaining readability and information retention.

Certifications

Data Analytics and Visualization Job Simulation: Accenture|Forage — Nov 2024
Introduction to Data Science: Infosys|SpringBoard — Nov 2024
Python Essentials: Cisco|Network-Acadamey — Oct 2024
Programming In Java: Nptel — Oct 2024
Problem Solving(Intermediate): HackerRank — Sep 2024

Coding Profiles

GeeksForGeeks- Rank is 54044 with over 250 problems Solved — @rithviktexkus
LeetCode- Solved 200+ problems in DSA — @mr_rithvik_
Hackerrank- Achieved 5-star rating in Python and SQL — @rithviktejagand1
